Preliminary Plan of the Meeting on 22.08.24 @10:00

Dear Dr. Danielly,

Unfortunately, I did not have enough time in order to prepare a detailed letter of my complaints, in front of this meeting. This is a preliminary plan for our today's discussions:

1. A professional competence of Dr. Roie Taman Plastic Surgeon, Reg. No.: 121933/140738.
 - 1.1. Operation area shaving and other antiseptic measures and norms.
 - 1.2. "Cosmetic" operation execution as for animals (Dissection/Suturing/Soldering,...).
 - 1.3. Sewing/Suturing and Electrical Cauterization of a postoperative wound.
 - 1.4. Plastic wires as mandatory threads, ignoring the self-absorbing and silk threads usage, and ignoring a threads selection by a patient.
 - 1.5. Inaccurate and improper sealing of a postoperative wound.
 - 1.6. Postoperative bleeding.
 - 1.7. The 21-Day threads removal period of the PLASTIC WIRES.
 - 1.8. Commercial claims against a patient during a surgeon re-operation.

2. Threads removal at the Maccabi Holon Eli'ezer Hoffien.
 - 2.1. The 21-Day threads removal period should be reasonable and flexible (10-15 days), according to an actual postoperative wound condition, and under a patient control, as it is being in Sheba Medical Center, in Maccabi Holon Ge'ulim.
 - 2.2. This point(s) is/are applicable to all, nurses, dispatchers, a duty doctor, and the administrative management of the Maccabi Holon Eli'ezer Hoffien Center.

3. General but important organizational aspects.
 - 3.1. Maccabi Holon Hoffien formalized games, turn sequence to nurses and physiotherapy.
 - 3.2. Maccabi Holon Hoffien phone/e-mail/fax unidirectional communication. NO live phone.
 - 3.3. Maccabi Israel stupid digitalization with phone unidirectional communication and with the stupid personal identifying by anonymous phone operators and third-party call center.

The corresponding pictures and documents by Maccabi, by Sheba Tel HaShomer MC and by TLVMC to be provided personally by "smart"-phone, and by e-mail after the meeting.

Thank you.

Sincerely,

Oleg T.
